DATA CLOUD

THERE'S A GREAT DEAL GOING ON

www.datacloudnordic.com

Welcome to Datacloud Europe 2017

A warm welcome to Monaco for this year’s Datacloud Europe congress - the fourth in this exceptional Mediterranean location!

The 2017 event promises to sustain its mission as the premier networking brand for the leadership of data centre, cloud and IT infrastructure professionals. It is the place to be and do deals with companies across the sector.

As markets continue to evolve across Europe, an interesting time lies ahead with economic regeneration, the emergence of new sub-markets and deployment of edge data centres, all driven by enterprise demand.

In looking forward, the European markets continue to demonstrate growth and consolidation, but this brings with it the prospect of greater regulation. It is important therefore for the industry to demand a much stronger voice at regional level. We hope that Datacloud provides a great opportunity to begin this process.

In the meantime, please enjoy the event, connect with old and new colleagues and find ROI!

Philip Low
Chairman
BroadGroup

Programme	26
Exhibition Floorplan	34
Exhibitors and Sponsors	36

VISITOR INFORMATION

Opening hours: 08:00 - 18:00.

App: Our event App contains everything you need to make your visit run smoothly. Search for ‘Datacloud Events’ in the app store and log in using your email and the password: *datacloud europe*

Banks: The nearest ATM is located next to the cloakroom as you enter to your right.

Catering: All catering is included, and tea coffee and water are available all day.

Cloakroom: Located to the right as you enter Grimaldi Forum.

First Aid: Should you require first aid, please contact security or the organiser's office where assistance will be provided.

Lost Property: Please contact security or visit the organiser's office.

Organiser's Office: This is located at the front of the exhibition hall.

Toilets: The toilets are situated at the entrance of Ravel.

Wi-Fi: Free wi-fi is available across the venue. SSID: *DCE2017* Password: *broadgroup*

Taxis: Please go to the hostess desk at the main entrance. Please order a few hours in advance.

Life Is On

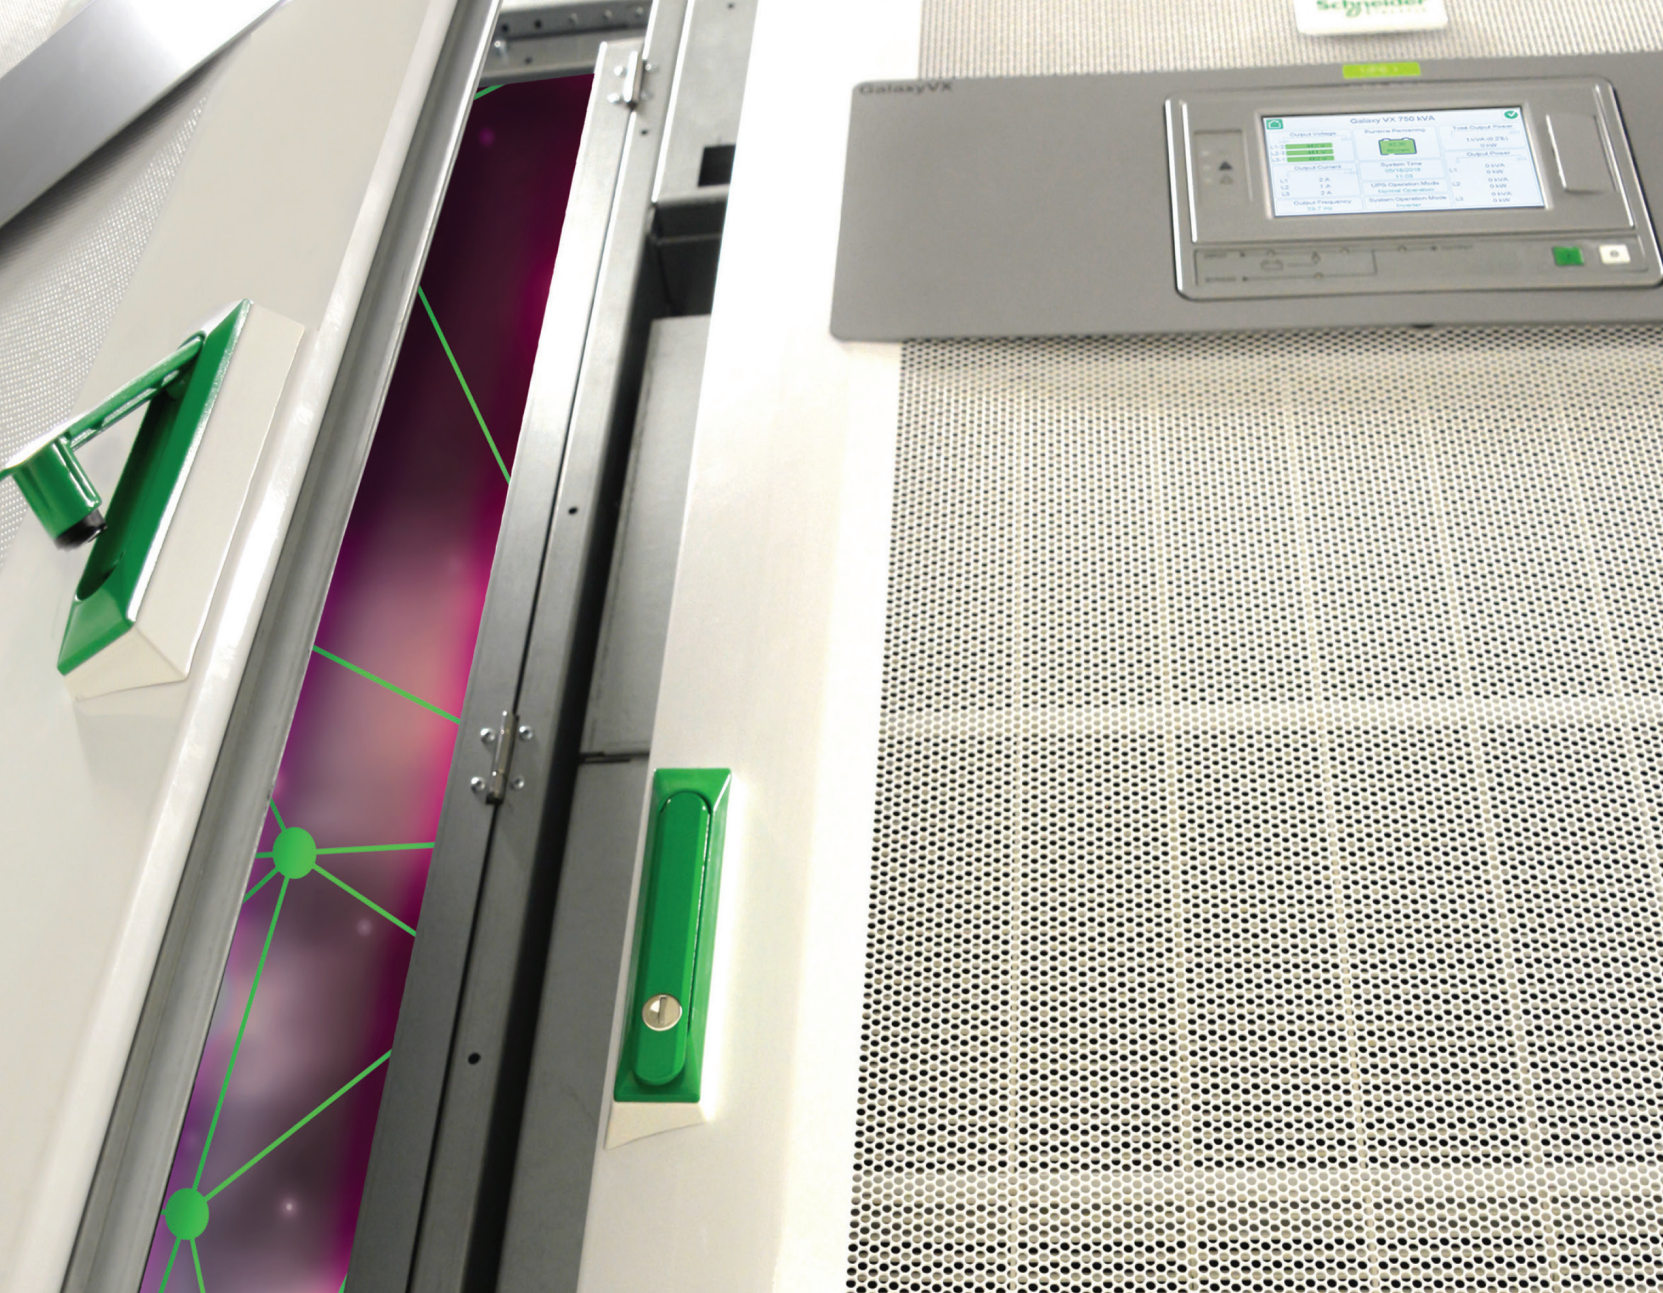

Fast, reliable, and customized for you.

Fast, reliable, and customized for them.

Scalable data center solutions help everyone get ahead.

Our expertise in data center can be your greatest asset in the fast-growing colocation market space. Let Schneider Electric help you build a profitable business by designing scalable, modular solutions to accelerate time to market, minimize risks, and maximize operational and energy efficiencies. You and your clients will experience only the benefits of our teamwork.

schneider-electric.com/datacenters

The Galaxy VX UPS: The possibilities are uninterruptible...

Explore a galaxy of innovation.

The Galaxy™ VX UPS provides unyielding power-security for high-demand colocation facilities. Starting at 1250kVA, its future-proof, pay as you grow architecture grants exceptional cost of ownership, and with a kVA of 1250 and the ultra-high efficiency EConversion™ Mode, you'll run your enterprise with uninterrupted peace of mind.

The background of the entire page is a dark blue grid with a pattern of small white plus signs. Overlaid on this is a large, glowing blue wireframe sphere on the right side, which contains a 3D architectural rendering of a modern data center building. On the left side, there are several horizontal lines of binary code (0s and 1s) in a light blue color, some of which are connected by thin white lines to form a network-like structure. In the top left corner, there is a white rectangular box containing the Siemens logo and tagline. In the bottom right corner, there is a large teal rectangular box containing the main headline and body text. At the very bottom, there is a white horizontal bar containing the website URL.

Utmost transparency through digital transformation

Our holistic management approach offers complete transparency for better decision making and enables reliable, safe and efficient IT and facility data center operation. With our performance and advisory services, we optimize your data center infrastructure and make the operation energy efficient and sustainable during the whole lifecycle.

At Datacloud Europe, we at Siemens and Atos will jointly showcase our answers to today's market challenges and trends.

[siemens.com/datacenters](https://www.siemens.com/datacenters)

Shape the future of your digital data center

In the new digital economy, the cloud and the data center become pivotal in customer service provision to deliver the flexibility, agility and innovation required to meet demanding customer expectations.

Atos provides comprehensive resource and expertise, from transition and orchestration services through to application development environments and infrastructure brokering. Atos is thus one of the few companies that can engineer and enable the enterprise hybrid cloud.

At Datacloud Europe, we at Siemens and Atos will jointly showcase our answers to today's market challenges and trends.

Global Cluster of Connected Data Center Parks

Fast Go to Market

Shovel ready, pre-zoned data center locations with ready to connect infrastructure.

Open Connectivity

Open access, carrier neutral in-Park fiber-rooms assuring resilient and competitive connectivity.

Global Footprint

Multi-country presence with world-wide rollout, bringing affordable geo-diversity.

Robust Security

Park-level cyber and physical security with hardened infrastructure facilities.

NxtVn Parks' unique ecosystem serves as a natural habitat for all data center players, whether hyper-scale or private cloud, where they can build, operate and grow their business in a reliable, scalable and secure ecosystem.

NxtVn flagship Data Center Parks in Halli – Finland, Eemshaven – The Netherlands, and Alexandria – Egypt; offer excellent operational efficiencies and unprecedented fast go-to-market time.

Virginia Beach – USA, Marseille & Calais – France, coming soon.

NxtVn is a strategic partner of the independent
Amsterdam Internet Exchange – AMSIX™

COMPLETE POWER SOLUTIONS. FROM A SINGLE SOURCE.

MTU Onsite Energy provides complete power solutions that deliver outstanding reliability and performance. From mission-critical power supply to control reserve to continuous power and heat and cooling supply, MTU Onsite Energy delivers dependable diesel and gas power generation systems. With several thousands of installations worldwide, MTU Onsite Energy is trusted to provide reliable and sustainable power solutions meeting international codes and standards. More than 100 years of engineering expertise and management of power generation projects have enabled us to develop and provide complete power solutions tailored to data center needs. The combination of proven technology and the expertise of our data center engineering staff mean that we are the partner you can rely on.

Part of the Rolls-Royce Group

YOUR MISSION IS CRITICAL. THAT'S ALL WE THINK ABOUT.

In this hyper-connected technology-dependent world, you need to deliver data and computing power without fail. The success of your business depends on it. Vertiv™, formerly Emerson Network Power, makes your success possible by delivering infrastructure and management solutions - including the ASCO®, Chloride®, Liebert®, NetSure™ and *Trellis*™ brands - for colocation, cloud hosting, communication networks and IT installations. We create value for our customers by making your critical mission our own.

REDIFINING DATA CENTRE INFRASTRUCTURE

Modern IT providers require control of their operations at all times. They need to always be available performing efficiently and economically to allow the business to satisfy customer service levels while meeting financial goals.

Vertiv brings together the most trusted and experienced names in critical infrastructure. We were first to protect mainframes with precision cooling systems. We were the first to introduce an integrated enclosure system to distributed networks. We helped some of the largest names in the industry bring new capacity online faster and at a lower cost when search and social media required it.

And now as IT challenges and demands grow, we continue bringing you innovations to strengthen the most vital applications across your data centre.

POWER

- Efficient, scalable UPS systems
- Innovative energy storage systems

SERVICES

- Remote service, intelligent dispatch
- Analytics-based maintenance
- Integrated technical support

THERMAL MANAGEMENT

- Machine learning control software
- Water-free economisation
- Edge computing IoT applications

SOFTWARE

- Infrastructure management
- Asset management
- Real-time access

UNIFIED INFRASTRUCTURE

- Rapid, modular deployment designs
- Integrated, tested solutions

IT MANAGEMENT

- Universal connectivity
- Real-time visibility and control
- Secure systems management

See how we can help you build a future where critical technologies always work.

How can our company set up a data center in **just one week?**

Data Center Deployment Challenge

When new opportunities arise, you need to set up a data center as fast as possible to take full advantage. But a traditional data center might take more than a year to build. Is there a way to set one up faster?

HUAWEI FUSIONMODULE1000A PREFABRICATED DATA CENTER

A fast and flexible way to tackle data demands within just one week.

A new generation data center is introduced and becomes successful. All components are pre-installed before delivery, making onsite installation unbelievably easy. A highly-efficient cooling and power system and hot aisle containment substantially save energy and are suitable for extreme environments from -40°C to $+55^{\circ}\text{C}$. Your fast and efficient data center is available now.

COMMScope®

EVERYONE COMMUNICATES.

It's the essence of the human experience.

How we communicate is evolving. Technology is reshaping the way we live, learn and thrive.

The epicenter of this transformation is the network—our passion. Our experts are rethinking the purpose, role and usage of networks to help our customers increase bandwidth, expand capacity, enhance efficiency, speed deployment and simplify migration.

From remote cell sites to massive sports arenas, from busy airports to state-of-the-art data centers—we provide the essential expertise and vital infrastructure your business needs to succeed.

The world's most advanced networks rely on CommScope connectivity.

Come and visit us on our networking lounge
7th and 8th of June at Datacloud Monaco, Grimaldi Forum.

How Cool Are You?...

Clever Cooling Solutions

designed for data centers

With a wide portfolio of Evaporative Free Cooling options, Munters' team of data center specialists can provide comprehensive design support to data center cooling engineers.

- Comprehensive design capability
- Sophisticated design software - detailed financial and thermal performance predictions (inc. hourly energy consumption for the full year, based on predictive weather data).
- Configurable systems
- Available for retrofit and new build
- Proven installations across the globe
- DataDek Evaporative Pads - an advanced version of the GlasDek evaporative cooling pads

TALK TO US ABOUT

- Data Center Cooling
- Indirect and Direct evaporative cooling solutions
- Make-up air and humidity control systems
- Energy efficiency
- Selection software
- Testing & Service and support

PTS WILL BE EXHIBITING AT DATACLOUD EUROPE

JOIN US ON STAND 41

**Our Data Centre experts will be showcasing
how PTS Makes the Complex Simple.**

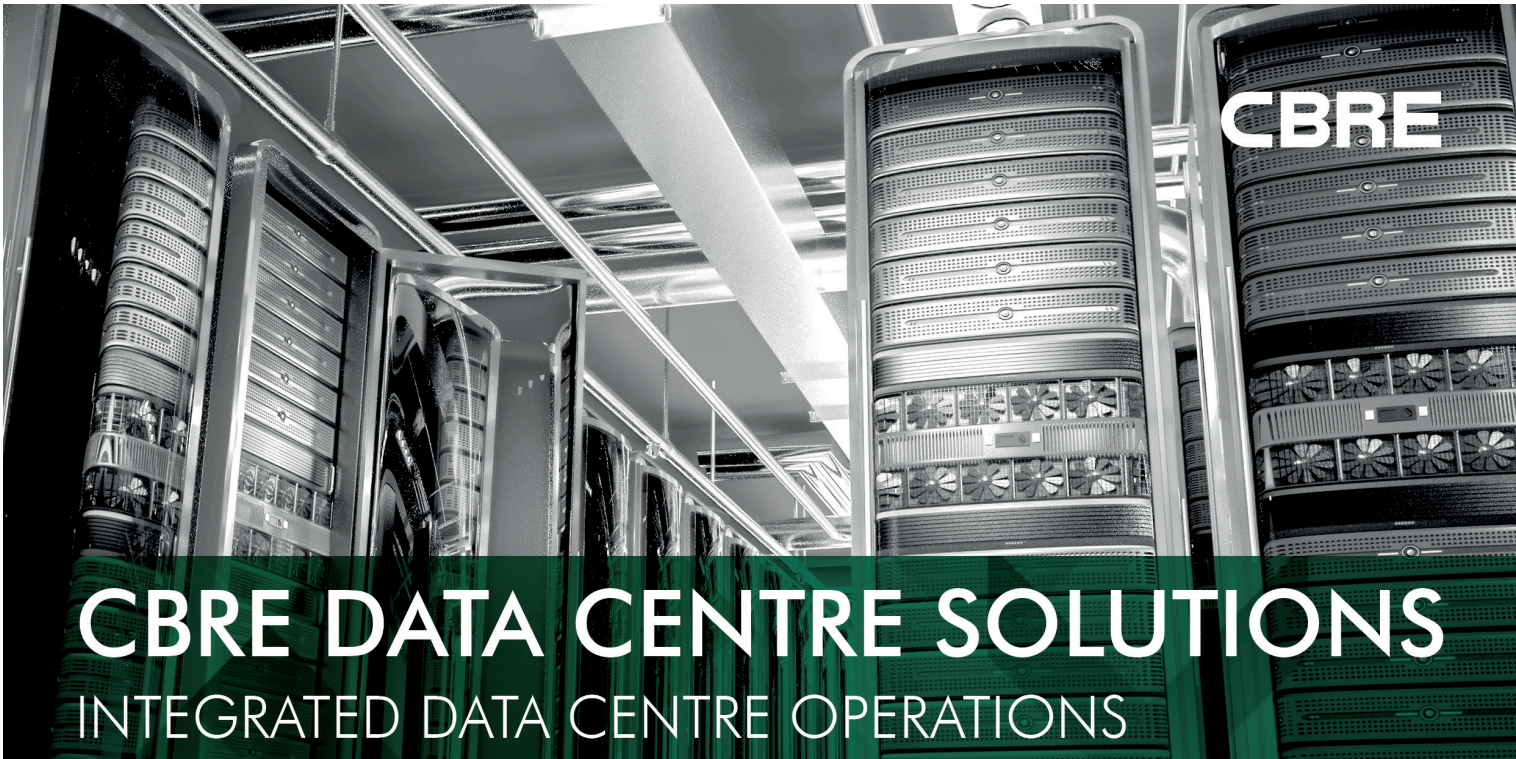

**From Due Diligence to Site Selection and
Procurement and Migration to Collocation & Cloud.**

Steve Bowes-Phipps: Senior Data Centre Consultant

Subject matter expert Steve Bowes-Phipps will also be presenting at the event, discussing how PTS helps prospective buyers to 'invest in confidence'. Join Steve on Thursday at 11:30am

Nick Tate: Marketing Lead

Kevin George: Data Centre Practice Director

CBRE

CBRE DATA CENTRE SOLUTIONS

INTEGRATED DATA CENTRE OPERATIONS

We provide you the peace of mind to focus on what's next

The data center industry is rapidly evolving. CBRE is your strategic advantage.

CBRE Data Centre Solutions provides integrated data centre operations to manage mission critical facilities and IT infrastructure around the world.

We manage more than 7.2M M² of white space across 610+ sites for the world's leading co-location, hyperscale, and enterprise firms by utilising our proprietary risk management program — proven to decrease human error related risk by up to 80%.

As an employer of choice in the industry, we are able to recruit and retain in nearly every geographic region to support your growth vision.

We provide our 5,000+ data centre engineers twice the recommended industry training to prepare them for our highly-efficient approach to converged facility management and IT support services.

As the largest real estate data centre service provider, CBRE is uniquely positioned to deliver integrated, operational solutions focused on managing your risk profile, increasing bottom line growth, and decreasing total cost of ownership.

Commercial advice for the data center market

***Eversheds Sutherland** is a global law brand at the forefront of the data center market. Our cross-disciplinary team works with data center owners, operators, funders and enterprises that need or use them, providing swift, commercial and cost-effective advice.*

The legal challenges facing data centres are unique, requiring a distinct blend of legal advice. Our team of advisors are fully immersed in the sector, and not only understand the legal issues but also have a deep appreciation of the market. Operating out of 61 offices across 29 countries and a network of over 200 related law firms including formalized alliances in Latin America, Asia-Pacific and Africa, our lawyers provide legal advice of the highest quality across the technology sector, wherever in the world our clients need us.

Programme Day 1

JUNE 2016

CENTRAL THEATRE

Day 1, Espace Ravel, Level +1

@datacloudEurope

07:50 Registration & Continental Breakfast

Guest Host for Theatre

Spencer Kelly, Presenter of TV technology programme Click

09:00 Data Centre Forum presented by the Infrastructure Masons

Keynote: The Challenges of Building Large Scale infrastructure for the Cloud?

Christian Belady, General Manager - Cloud Infrastructure Strategy and Architecture, Microsoft

Keynote Discussion: What's wrong with data centers?

Dean Nelson, Head of Compute, Uber

Joe Kava, VP of Data Centers, Google

10:15 Internet of Things - Driver for Data Center Demand & Performance

Thierry Chamayou, Regional Vice President EMEA South, Schneider Electric

10:45 Disruptive innovation and its mandate on infrastructure

William Barney, CEO, Reliance & Global Cloud Xchange

11:10 Data Centre Global Leadership Roundtable

Chair: Michael Tobin OBE

Christopher Kenney, SVP International, Digital Realty

William Barney, CEO, Reliance Communications & Global Cloud Xchange

Eric Schwartz, President EMEA, Equinix

Byrne Murphy, Chairman, DigiPlex Group of Companies

11:40 Energy - will there be enough?

Chair: André Rouyer, Délégué, Gimélec

Jean-Jacques Nieuviaert, Chief Economist, Union Française de l'électricité

Kim Schultz, Special Advisor, Invest in Denmark

Martin McCarthy, Customer Relations, EirGrid Group

Tommy Ström, Head of Production Planning & Optimization, Fortum, Invest in Finland

Claude Turbet, Managing Director Solutions for Businesses, Engie

12:10 Data Center - 4.0

Sanjay Sainani, Regional VP of IT & Data Center Solution, Huawei

- 12:40 Data center operations profiting from digitalization, data analytics, and IoT - while mitigating risks in cyber security**
Wim Los, SVP Head of Technology Transformation Services, Atos Global Managed Services
Urs Iten, Head Global Portfolio Management, Data Center Solutions & Services, Siemens
Chris Moret, Vice-President CyberSecurity, Atos Big Data & Security
- 13:20 Presentation**
Khaled Sedrak, Founder & CEO, Nxtvn
- 13:40 Accelerating Digital Transformation and creating competitive advantage with partner ecosystems - Cloud28+**
Andrea Monaci, Marketing Director, EMEA, Cloud and Service Providers, HPE
- 14:00 Innovating in Cybersecurity: The CDO's View**
 Chema Alonso, Chief Data Officer, Telefónica
- 14:30 Introduction to Blockchain and What it Means for Business**
 David Siegel, Authority on Business Agility and Blockchain
- 15:00 Exploring Edge Data Center Infrastructure**
Rob Pfleging, Senior Vice President, Global Solutions, Vertiv
- 15:20 How Fast changing demand will create new challenges for data centres**
Kamlesch Patel, Director, Global Data Center Solutions, Connectivity Solutions, CommScope
- 15:50 Fuelling the cloud**
Detlef Spang, EVP Data Centre Services, Colt Datacenter Services
- 16:15 AI Disruption and Data Centres**
Mark Thiele, CIO and CSO, Apcera
- 16:35 How colocation data center meets the ever-changing requirements of our rapid-paced digital economy?**
Moderator: Greg Jones, Director of Business Development, Schneider Electric
Fabrice Coquio, Managing Director, Interxion France
Olivier Micheli, CEO, DATA4 Group
David Blumanis, CCO, Supernap International
Phill Lawson-Shanks, Chief Architect & VP of Innovation, EdgeConnex
- 17:10 Sweden at the forefront of Cloud**
Tomas Sokolnicki, Head of Data Centers by Sweden
Martin Körling, Head of Cloud Portfolio Strategy, Ericsson
- 17:30 Enterprise Connectivity, Resiliency, and Security**
Chair: Charles Hoop, Vice President Infrastructure, Accenture
Eric Dominguez, Director of Solutions Architecture, ServerCentral
Thomas Leidenbach, Vice President IS, Bombardier Transportation GmbH
Josh Snowhorn, Vice President & General Manager of Interconnection, CyrusOne
- 18:10 Close of Theatre**

INNOVATION AND INVESTMENT THEATRE

Day 1, Espace Ravel, Level +1

08:00 Registration & Breakfast

10:15 Session Chair: Bernard Lecanu, President, BLIC Consulting

10:20 “Soup to Nuts” How the Data centre and Cloud enabler market is shaping up

An overview of the data centre and managed services/cloud landscape, the operators, what they offer and what they don't.

Michael Tobin OBE

10:45 State of the Market Review

Steve Wallage, Managing Director, BroadGroup Consulting

11:00 Session Chair:

Gerd Simon, Independent Consultant

What investors are looking for in this market

Data centres as an asset, renewed interest by PE, access to capital markets for funding, key opportunities emerging globally, the types of finance available, current M&A activity, debt versus risk and future investor outlook in the data centre market globally.

Chair: Steve Wallage, Managing Director, BroadGroup Consulting

Jon Mauck, Principal, Digital Bridge

Christian Mouchbahani, Founding and Managing Partner, M Capital Group

Roger Karam, Chief Executive Officer, Northern Investment Partners

Anand Srinivasan, Senior Analyst - Technology, Bloomberg Intelligence

John Wilson, COO, Stellium Datacenters

Jeffrey S Ferry, Director, Goldman Sachs

11:30 Look to the Nordic region: the global front runner in data centres

Gisle M. Eckhoff, CEO, Digiplex

11:55 Colocation Europe Panel

Where do you see the key growth drivers in Europe over the next year ahead?

How has privacy legislation and regulation influenced your own business plan?

Do you see webscale players as mainly an opportunity or a threat?

BroadGroup is forecasting the co-location market in Western Europe will grow to approximately €13.5bn in 2020, with a CAGR of ~11% - do you agree with that outlook? What might act as market inhibitors during that period?

Chair: Alex Rabbetts, Board Member, European Data Centre Association

Gisle M. Eckhoff, CEO, Digiplex

Anne Graf, CEO, Hydro66

Heiko Koop, CEO, Linxdatacenter

Adam Tamburini, Director, e-shelter

Apostolos Kakkos, Chairman & CEO, LAMDA Hellix

Detlef Spang, EVP Data Centre Services, Colt Datacenter Services

12:25 Are Brokers an endangered species in a commoditized data centre world

What is the role of the Broker in the new world of Hyper Scale and Commoditized Data Centres?

As Enterprises move to Cloud - how will Brokers justify their existence

Is there a bubble in the Hyper Scale deployments - what happens next?

Who uses brokers now in 2017? Are they needed more than ever or is the end in sight?

Chair: Jason O'Conaill, Partner Director, Infinity SDC

Andrew Jay, Executive Director, CBRE Limited

Tim Anker, Founder and Director, Colo-X

Everett Thompson, CEO, WiredRE

13:00 Lunch

13:20 Session Chair:

Margrit Sessions, Managing Director, Tariff Consulting

Will cloud-based software services change the game for data center management?

IoT, big data and cloud services all have the potential to dramatically change how data centers are managed.

Find out how live data collection, machine learning, and big data analytics can provide real-time operational visibility, alarming, remote troubleshooting and predictive analytics for an efficient data center.

Kim Povlsen, VP & General Manager Digital Services and Data Center Software

- 13:40 Software-Defined Infrastructure: An Auto-Pilot for the Data Center**
The Sperry A-5 is a high-speed gyroscopic autopilot that provides true visibility and clarity into a plane's flight operations. At a glance, this instrument allows a pilot to make faster, more stable corrections of the aircraft, even at night and during adverse weather conditions. Data center managers also require real-time visibility into power, performance and thermals. Under any conditions, a highly-automated, software-defined resource model and orchestration layer can protect data centers against potential equipment failures and otherwise undetected cooling anomalies. It also empowers data center managers to "fly straight," readily right-sizing their hardware resources on demand.
Jeff Klaus, General Manager, Data Center Solution, Intel
- 14:10 Valuations and exits in data centres**
Chair: Steve Wallage, Managing Director, BroadGroup Consulting
Tom Wells, Partner, Arma Partners
Sicco Boomsma, Director, Structure Finance TMT, ING
Tom Phillips, Investment Director, Downing LLP
Jeffrey Krogh, Managing Director, BNP Paribas
Antoine Boniface, Managing Director, Etix Everywhere
- 14:40 Innovation in Data Centers: Water Cooled Data Centres**
James Connaughton, CEO, Nautilus Data Centers
- 15:00 Session Chair:**
Richard Hall, CEO, CloudOrigin
- Selecting Data Centre Location - is it just about power?**
Chair: Marion Howard-Healy, Senior Consultant, BroadGroup
Steen Hommel, Director, Invest in Denmark
Ville Toivanen, Development Manager, Telia Finland
Fabrice Coquio, Managing Director, Interxion France
Xavier Mercier, Market Segment Director, Socomec
Patrik Öhlund, CEO, Node Pole
- 15:30 Addressing the many faces of Edge Computing**

Constantinos Shiatas, Senior Banker (ICT), European Bank for Reconstruction and Development

13:00 Presentation

Johannes van de Kemenade, Chief Compliance Officer, NxtVn

13:20 Lunch

Afternoon Chair:

Keith Breed, Senior Consultant, Tariff Consultants

14:00 Network Development and Connectivity in Africa - how far have we come?

The collaboration between different countries in Africa in extending optical networks across the continent is still in its infancy in many places. Stronger inter-government cooperation is required to achieve ubiquitous African interconnectivity.

Chair: Jonathan Hjembo, Senior Analyst, Telegeography

Tage Rasmussen, CTO, Afrimax

Chris Wood, CEO, WIOCC

Amine Kandil, CEO & Founder, N+One Datacenters

Reid Fishler, Director, Hurricane Electric

14:30 The Power of Collaboration: Nigeria to the Netherlands

Etienne Rochelle, International Account Manager, Minkels

Egomaron Jegede, Technology Projects Manager, MainOne

14:50 Cloud for Africa

Dr Shiyghan (Emmanuel) Navti, Head of Cloud Advisory Group, Vodafone Global Enterprise and Director, Africa 2.0 Foundation

15:10 Challenges in data centre deployment in Africa

How will the principal challenges of data sovereignty, power supply issues, and construction which confront all countries impact as a growing digital economy across the continent continues to foster increased demand?

Chair: Michael Tobin OBE

Olivier Labbe, CEO, Cap DC

Lee Smith, Director, DS Experienced Datasmiths

Peter Alfred-Adekeye, CEO, CTO, Multiven

Ross Macdonald, Principal, Ngoya, Etix Everywhere

15:40 Mastering the operation of the data center requires training and tools

Christophe Weiss, Directeur Général, APL

16:00 Leading in Africa: how data centers can become your strategic asset?

Frédéric Bouchez, Director of Innovation & Marketing, Etix Everywhere

16:30 Prefabricated Data Centres

Mark O'Sullivan, Sales Director EMEA, Flexenclosure

16:55 Cloud Hosting Business in Africa: Market Specifics and Ways to Grow

Zied Ouled Ali, Founder & Project Manager, SAFOZI - Rock Solid Cloud Infrastructure

Ruslan Synytsky, CEO and Co-Founder, Jelastic

17:25 Next Steps for Africa Data Centres

INFRASTRUCTURE MASONS LOCAL MEET-UP

Day 1, Auric Room (take escalator in main lobby down)

Dean Nelson (founder Chairman), Oliver Jones (Board Member), and Winston Saunders (Education Committee Chair) will lead the session where members will provide input and guidance on defining the European focus for iMasons.

JUNE 2016

CENTRAL THEATRE

Day 2, Espace Ravel, Level +1

08:00 Registration & Continental Breakfast

09:45 Size Matters

Hossein Fateh, Founder and Principal, CloudHQ

10:10 Presentation

Gain Competitive Advantage by Expanding Your R&I Activities: Real Time, Real Info for Effective North American ICT Collaboration through the DISCOVERY Project.
Claudio Caimi, Program Manager - Security Team, Discovery Project partner, HPE

10:30 Enterprise Roundtable

Hosted by Uptime Institute.
Chair: Phil Collerton, Managing Director EMEA, Uptime Institute
Charles Hoop, Vice President Infrastructure, Accenture

11:05 Cashaa - Blockchain Innovation Touching the Masses

Kumar Gaurav, Founder, Cashaa/Auxesis Group

11:30 Building the Digital Brand for Data Centre and Cloud

Chair: Nicola Hayes, Managing Director, EUDCA
Fredrik Jansson, Chief Marketing Officer, Digiplex
Andrea Monaci, Marketing Director, EMEA, Cloud and Service Providers, HPE

12:00 Investing in Data Centres with Confidence

Stephen Bowes-Phipps, Senior Data Centre Consultant, PTS Consulting Group

12:20 ExaNeSt - Designing Infrastructure for the EU 2020-23 ExaScale Supercomputing Program

Peter Hopton, Founder, Iceotope & Technology Lead for EU ExaNeS

12:45 Combined IT and FM Operations in the Data Centre

Mark Acton, Critical Services Director - CBRE Data Centre Solutions

13:10 Lunch

JUNE 2016

INNOVATION AND INVESTMENT THEATRE

Day 2, Espace Ravel, Level +1

08:00 Registration & Breakfast

09:45 Innovating sustainable hyperscale solutions

Christian van Terheijden, CEO, Minkels
Peder Næbø, CEO, Bulk

10:15 Building an Open, Distributed IoT Data Network for Communities and Businesses

Johan Stokking, Tech Lead and Co-Founder, The Things Network

10:40 Cloud Native Operations: Bringing the operations power of the internet giants to modern enterprise

To achieve the economies of scale needed to power the internet, companies like Google, Facebook and Twitter co-evolved new application patterns and operations practices over the last decade.

That which allowed them to operate at scale are now becoming accessible to everyone through open source projects like Docker and Kubernetes. An obvious benefit is that this allows enterprises to deploy massive amounts computational resources to solve new problems, but the impact on traditional IT systems is as profound and interesting although less understood. Cloud Native technologies will introduce new, highly specialized operations roles that will impact not only the way that development teams operate, but their structure, philosophy and relationship with the business.

During this discussion, we will talk about how cloud native technologies support a new operations paradigm, and will work from first principles to show the benefit to the modern enterprise in terms of efficiency, productivity and agility of systems.

Craig McLuckie, CEO, Heptio

11:00 DevOps In The Public Cloud To Accelerate Delivery & Innovation

How using DevOps approaches on public cloud platforms can accelerate time to market for applications.

Benjamin Wootton, CTO, Contino.io

11:20 Wireless Service availability in the DataCenter for DataCenter operations

Ronald van Kleunen, Managing Director, Globeron

11:45 The Future of Data Centre Education

Andrew Stevens, Managing Director, CNet

12:15 The Green Grid's Opens Standard for Datacenter Availability (OSDA the Tool)

Lex Coors, Chief Data Center Technology and Engineering Officer, Interxion

12:45 Lunch

DATA | ECONOMY

Defining data centres and cloud 24/7

**MEET US AT
STAND 66**

Data Economy is the first 24/7 definitive resource to report, analyse and interpret international markets and trends for data centres and the cloud services they offer, the explosion in enterprise demand drivers and disruptive technologies, and the financial perspective of investors in this ecosphere.

With a global focus, Data Economy tells the complete story through daily news, analysis, opinion and insight across the world's most important digital businesses.

Aimed at senior cloud services and vendor industry professionals, the movers and shakers in data centre and cloud finance and investment, enterprise infrastructure leaders, real estate, law and professional intermediaries, this new magazine uniquely captures real and timely information for these important demographics.

Subscribe today to receive the Data Economy headline daily summary.

Ultra efficient green colocation

A secure, reliable and sustainable long-term solution

With ultra-reliable power grids and the newest fibre optic networks intersecting, Hydro66 provides a smart, safe and stable data model. Our mission is to answer the data sustainability challenges of the next 20 years in a cost effective way. **Today.**

100 % certified carbon neutral hosting

Connected to a river system generating 25 % of Sweden's power, we offer a certified 100 % carbon neutral alternative for hyper scale data compute and store. Without compromising on security or stability Hydro66 is designed with the environment and the user in mind. A sustainable model of the future. **Today.**

Save 50 % or more

Reliable, green and scalable hydropower at ultra-low costs. Inexpensive yet unlimited diverse bandwidth. Maximised free air cooling. Efficient technology for smart colocation hosting. All this adds up to great price points, incredible savings and the lowest total cost of ownership. **Discover more today.**

Data Center Management Solutions
Intel Corporation

The Sperry A-5 is a high-speed gyroscopic autopilot that provides true visibility and clarity into a plane's flight operations. At a glance, this instrument allows a pilot to make faster, more stable corrections of the aircraft, even at night and during adverse weather conditions.

Data center managers also require real-time visibility into power, performance and thermals. Under any conditions, a highly-automated, software-defined resource model and orchestration layer can protect data centers against potential equipment failures and otherwise undetected cooling anomalies. It also empowers data center managers to “fly straight,” readily right-sizing their hardware resources on demand.

Packing more power into the same flexible design.

Introducing **1200 Amp Starline Track Busway**,
the newest addition to the T5 Series.

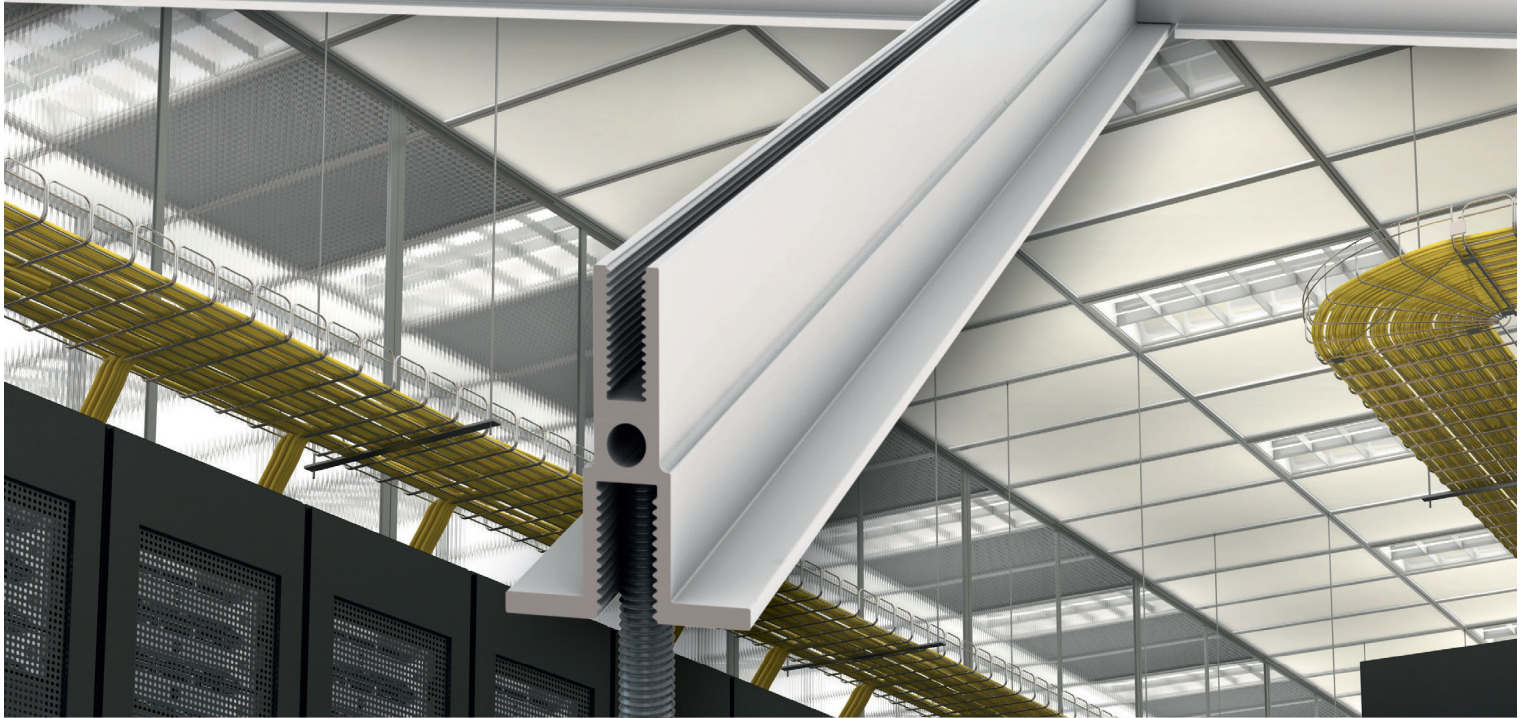

Starline's newest addition to our line of track busway options delivers even more power, without losing any of the flexibility that you've come to rely on from our T5 Series. The 1200 amp busway still has our unique, modular, build-as-you-need design, and is equipped for high-density electrical distribution under the most demanding conditions in data center and mission critical environments. Best of all, the same plug-in units can be used for all systems in the T5 series—from our 250 amp to the new 1200 amp. To learn more about our newest and largest busway choice, visit StarlinePower.com.

STARLINE®
TRACK BUSWAY

Structural Ceiling Grid by Tate

Versatile. Customized. Engineered.

- Support a wide selection of heavy data center accessories including cable trays, bus bars, and containment
- Continuous threaded slot allows for unlimited flexibility
- Decreases both installation time and cost
- Multiple extrusion types available - including M10, $\frac{3}{8}$ ", $\frac{1}{4}$ ", $\frac{1}{4}$ " hidden slot, and light structural support

Only a perfect plan leads to a perfect datacenter.

There are many ways to create datacenters. But there's only one way that leads to a perfect datacenter. And that's a way with a perfect plan. It's a way of building we started with 25 years ago. And we've been perfecting that way ever since.

An approach that has led to over 20 perfect datacenters worldwide, that all perfectly protect our clients' data, their wallet, and the environment.

If you're interested in the perfect plan for your perfect datacenter, simply follow this floor plan.

DATA CLOUD

THERE'S A GREAT DEAL GOING ON

www.datacloudasia.com

Fast design time.

Even faster lease time.

Integrated data centre infrastructure speeds up projects.

Simplify your colocation project – from design to build to operations – to sign leases and fill space quickly. Green Mountain Data Centres in Rjukan, Norway, leveraged our infrastructure solutions to get up and running in just five months. Schneider Electric can help you deploy a colocation site that's just as unique and sustainable — on your schedule.
